PROFESSIONAL SUMMARY

Lead Data Engineer with 5.5+ years of experience designing and leading end-to-end data platforms across **AWS, Azure, and Microsoft Fabric**. Currently **leading the entire data engineering team** at DxFactor, with a proven track record architecting real-time and batch lakehouse solutions — **processing 1B+ records/day**, **building 1,000+ data pipelines**, and **delivering 500+ analytical dashboards** for enterprise and government clients. **2x Microsoft Certified** (DP-203, DP-700). Recognized with **4+ company awards** for technical excellence, leadership, and client impact.

CERTIFICATIONS

Microsoft Certified: Fabric Data Engineer Associate (DP-700) | Score: 934/1000

Mar 2026

Microsoft Certified: Azure Data Engineer Associate (DP-203) | Score: 925/1000

Mar 2025

TECHNICAL SKILLS

Languages & Processing: Python, SQL, PySpark, Spark SQL

Cloud — AWS: S3, Glue, Lambda, Athena, DMS, SNS, CloudWatch, QuickSight, QuickSight Embedded

Cloud — Azure: Data Factory, Synapse Analytics, Databricks, Azure SQL Server, Microsoft Fabric (Lakehouse, Data Warehouse, Notebooks)

Data Platforms: Snowflake (Tasks, SPs, SPICE), Apache Iceberg, Delta Lake, Apache Kafka, Fivetran, Databricks Unity Catalog

Databases: PostgreSQL, TimescaleDB, MySQL, SQL Server, Oracle, Google BigQuery, MongoDB, Redis

Orchestration & DevOps: Apache Airflow, Snowflake Tasks, Git, Docker, Agile/Scrum

Visualization & BI: Tableau (Desktop, Online, Prep, Bridge), Power BI, QuickSight, Apache Superset, Sisense

Web & API: Django REST Framework, FastAPI, Streamlit

WORK EXPERIENCE

Lead Data Engineer

DxFactor

Apr 2023 – Present

Ahmedabad, Gujarat
(Hybrid)

Leading the entire data engineering team. Promoted from Data Engineer to Lead Data Engineer in Apr 2024.

Enterprise Data Warehouse — Microsoft Fabric

Dec 2025 – Ongoing

Tech: Microsoft Fabric (Lakehouse, Data Warehouse, Notebooks, Copy Activity), Power BI

- Leading a team of 5 (2 DEs, 2 junior DEs, 1 BA) to build a cloud-native data warehouse for a gym & fitness client with 100+ locations.
- Designed three-layer architecture: Fabric Lakehouse (raw/curated) and Data Warehouse (analytical); orchestrating ingestion from **28 data sources** via Copy Activity.
- Developed transformation notebooks for raw-to-curated and curated-to-analytical ETL, enabling self-serve Power BI reporting through views.

Enterprise Gym Data Platform — Fivetran, Snowflake & Iceberg

Aug 2025 – Ongoing

Tech: Fivetran, Apache Iceberg, Snowflake, Databricks Unity Catalog, AWS S3, QuickSight Embedded, FastAPI, Streamlit

- Designed end-to-end architecture for a high-value enterprise client with **10,000+ locations** and **16 SQL Server source systems**.
- Implemented real-time CDC via Fivetran from 16 SQL Servers into S3 (Iceberg) with Databricks Unity Catalog as metadata layer.
- Built curated-layer ETL in Databricks; analytical-layer transformations via Snowflake Stored Procedures scheduled through Snowflake Tasks (8-hour refresh).
- Created QuickSight dashboards with SPICE caching; built a QuickSight Embedded POC (Streamlit + FastAPI) in 2 weeks for branded analytics.

UGVCL Real-Time Lakehouse — Government Electricity Reporting

Jun 2025 – Aug 2025

Tech: Apache Kafka, Delta Lake, AWS S3, Trino, Apache Airflow, Docker

- Served as **Tech Lead** (3-month onsite, Baroda) for UGVCL, a government electricity company with **1M+ smart meter customers** across 4 zones.
- Designed fully open-source data lakehouse: real-time ingestion every 5–15 min via Kafka → Delta on S3 (raw/curated/analytical) → Trino → live website.
- Ingested **1B+ raw records/day** via Kafka and filtered to **50M+ records/day** stored in S3 raw layer; resolved small-file degradation with automated OPTIMIZE + VACUUM jobs on **10+ TB** of data.
- Delivered **20+ dashboards (80+ reports)** for real-time outage tracking, energy consumption, and meter health insights.
- Mentored 3 engineers (zero data background) through structured KT; client expanded scope from **60 to 200 dashboards** based on delivery quality.

Azure Synapse Data Warehouse

Apr 2023 – Ongoing

Tech: Azure Data Factory, Synapse Analytics, Synapse Notebooks, Python, Spark SQL, Mailchimp, SharePoint

- Built centralized data warehouse ingesting from AWS S3, Azure Blob, Mailchimp, and SharePoint into Azure SQL Server via Synapse pipelines.
- Developed ETL logic in Synapse Notebooks (Python + Spark SQL) for cleaning, transformation, and automated Mailchimp bulk email operations.

AWS Data Warehouse

Jun 2023 – Mar 2024

Tech: AWS DMS, Glue, Lambda, Athena, S3, PostgreSQL

- Built multi-layer data warehouse on AWS: raw (DMS → S3), curated (Lambda + Glue), analytical (PostgreSQL); created Glue crawlers for Athena querying.

Leadership Contributions — Apr 2023 – Present

- Currently **leading the entire data engineering team** at DxFactor across concurrent projects.
- Operate as **project starter** — architect solutions, build the foundation, deliver the first reports, then conduct structured KT to junior engineers for independent handoff.
- Own code reviews and Git merge/release workflows for staging and production environments.
- Presented technical POCs to stakeholders, converting **3-month engagements into 2-year long-term projects**.

Data Engineer

Jun 2021 – Mar 2023

Infosenseglobal Inc

Gandhinagar, Gujarat

Mlsense — ML Platform & Data Integration

Tech: Python, Django, PySpark, PostgreSQL, Azure SQL Server, MongoDB, NumPy, Pandas

- Integrated PostgreSQL, Azure SQL Server, and MongoDB into the Mlsense ML platform; implemented imputation, encoding, and outlier detection, improving feature pipeline performance by **40%**.
- Converted feature engineering logic from Pandas to Spark SQL for distributed processing at scale.

Data Migration, Visualization & Client Engagement

Tech: AWS DMS, Glue, Athena, S3, Tableau, Power BI, QuickSight, Sisense, Azure Synapse

- Migrated Azure SQL Server datasets to AWS S3 via DMS; built ETL pipelines with PySpark and Glue across AWS and Azure services.
- Built client-facing dashboards across **4 BI platforms** (Tableau, Power BI, QuickSight, Sisense); worked directly with clients for ~1 year translating analytical data into actionable insights.
- Developed dynamic data source switching and CSV/PDF export features for the Data Fusion module.

AWARDS & RECOGNITION

- **Team Excellence Award — Best Team** | DxFactor, Q2 2025–26
- **Catalyst Award for Change Management** | DxFactor, Q2 2025–26
- **Leadership Award for Exceptional Leadership** | DxFactor, Sep 2024
- **Catalyst Award of Excellence** | DxFactor, Oct 2023
- **1st Place — Prama AWS Quiz** | AWS Ahmedabad Community Day

EDUCATION

Bachelor of Engineering in Information Technology

2016 – 2020

Ahmedabad Institute of Technology (GTU) | CGPA: 8.21
